

# The Scoop Push N' Plow™

*Shown with optional rubber cutting edge*

## Lightweight. Durable. Affordable.

Bonnell Industries is proud to introduce the newest addition to our Push N' Plow Series. Our SSS Push N' Plow provides a lightweight, yet durable alternative for box plows. Made with the same quality engineering as all of our products, the SSS was designed to take weight out of the scoop, increasing your payload, and

giving you the strength needed to push the heaviest snow. Our SSS is constructed of 3/16" thick 100XF steel plate, which is 2-1/2 times stronger than A36 material, making this one of the toughest pushers available.

### Standard Features

- Lightweight and Durable
  - Fabricated from 3/16" thick 100XF steel plate
  - 2.5 times as strong as standard A36 material
- Built in skid steer adapter
- Available sizes:
  - 8' x 36" 650 lbs.
  - 10' x 36" 750 lbs.
- Endplates 3/16"
- Boxed bottom 3/16" formed angle

- Continuously welded
- Adjustable 1" thick AR400 wear shoes
